

Forward Thinking Best Practice

We are hosting two education seminars in Saskatchewan for clinicians and vendors to show how we can best assist you and your clients with positive outcomes, the ability to participate in daily activities, and engage with the world around them. Discussions will include: pressure management strategies, dynamic positioning, and manual and power mobility.

The seminar will highlight evidence-based information, case study examples and equipment solutions to daily client issues. There will be a strong focus on clinical application of various product features.

Products focused on will be:

- Permobil Power Mobility
- TiLite Manual Mobility
- SmartDrive Power Assist
- ROHO & Comfort Company Seating and Positioning

The seminar will be a combination of lectures and breakout sessions. Certificates of attendance and refreshments will be provided. Participation is free, but places are limited - please RSVP with your choice of location on the button links to the right.

“Every disabled person has the right to have his or her handicap compensated as far as possible by aids with the same technical standard as those we all use in our everyday lives.”
