SGI MRU PROCESS

Nurse reviews file and makes decision for assessing ability to drive (Driver could have both cognitive and physical disabilities)

Driver Evaluation Program (for both cognitive and physical conditions)

DriveABLE – DCAT (Would only be requested for cognitive conditions)(SGI pays)

New DAA completed by SGI driver examiners (If driver has physical impairments, if cognitive, DCAT would be requested first)

Based on result from Driver Eval, the driver maybe requested to complete **New DAA** completed by SGI driver

Test results sent to SGI and Nurse makes decision for next steps

MRU will make licence decision based on recommendations from evaluators

MRU will make licence decision based on recommendations from evaluators

Pass – periodic monitoring

Indeterminate – continue driving and request:

Fail – suspend driver's licence until:

Driver Evaluation (Regina or Saskatoon)

New DAA completed by SGI driver examiners

Driver Evaluation (Regina or Saskatoon)

DCAT – Driver can complete again (have to pay for it)

Based on result from Driver Eval, the driver maybe requested to complete **New DAA** completed by SGI driver

MRU will make licence decision based on recommendations from evaluators
