

MASTER OF EDUCATION IN HEALTH SCIENCES EDUCATION

The MHSE will help you expand and apply newly learned knowledge and skills in the areas of educational pedagogy, educational research, and interprofessional leadership in your workplace.

The MHSE provides opportunities for practical application of the coursework into your workplace context. Work with an interprofessional community of health educators to:

- Consider the challenges and opportunities in 21st century health sciences education
- Explore emergent, evidence-based research in health sciences education
- Experience new technologies used in teaching, research and practice such as simulations and digital media

APPLICATIONS

Applications open
November 1 to May 31.

Transform your health education practice.

The Master of Education in Health Sciences Education (MHSE) is an online, part-time program designed for working health professionals looking to build knowledge in areas of educational practice relevant to their professional context.

The program uses a cohort model to optimize the professional learning experience. Join an interprofessional cohort in virtual live classes. This is a course-based program that can be completed in two-and-a-half years.

QUOTES FROM GRADUATES:

"We were encouraged to bring our current situations/experiences to the table for discussion and as part of our assignments. That makes our learning practical, relevant and meaningful."

"....the process of learning together weekly with a group of health professional peers was fun and collaborative. Having been out of school for many years, there are processes and supports in place designed to help us succeed. "

The MHSE consists of eleven graduate level 3-credit courses.

- Eight required courses are completed in sequence with a cohort.
- Two courses are electives taken at the student's discretion.
- The final course is a directed research project.

REQUIRED COURSES

- EDHS 501: *Philosophy of Teaching*
- EDHS 502: *Learning and Teaching at the Adult Level*
- EDHS 503: *Introduction to Methods of Educational Research*
